Why you are in a meeting?

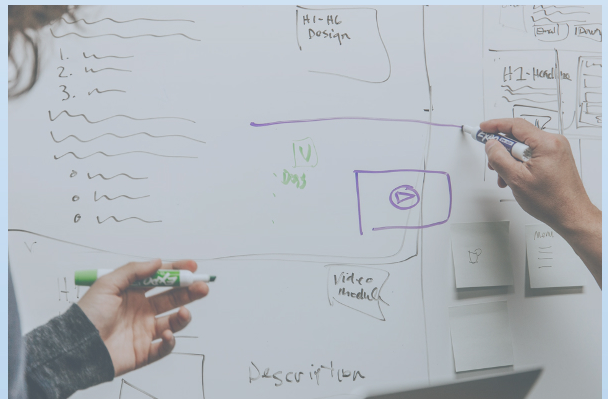

Purposes of your meeting may include, how to prepare your wedding party; how to reduce your costing in your company; deliver the direction of the company; how to increase sales; your startup plan; teaching in schools; coaching new staffs, worship, workshop or creating your next creative apps...

No matter what the purpose is, you may have lots of ideas or questions during the meeting, which you would like to share, or as the speaker, you may want

to circle the keywords on your presentation to let audiences to focus on it. This is what make Interactive White Board (IWB) become your important tools in the meeting room!

IWB helps you to bring presentation, video, audio, online searches, or even material you left behind at your home* to the big screen in your meeting room, and let you draw your comments onto it whenever or wherever you want.

Researches find that highlighting text will help to remember and to focus on what you have read. By using IWB, participants will be able to make comments or circle the keywords on the big display panel to make more efficient meetings. Each pages on the panel can be "save screen" individually and share among with all participants or those who couldn't join the meeting to keep record and to follow up.

Video conferencing was available before year 2020, but the new normal changes all work style, like work from home, work on shift to cut down number of people at office, no travel allowed, etc. actually push up the demand on video conferencing. In addition, there are more choices of video conferencing platform, so video meeting become part of your day @ work.

Before 2020, IWB mainly serve as a "display" unit in a meeting room, but with the need of video conferencing, users started to prepare their own web cam and microphones for to mount on the panel for video conference.

With this growing demand, we have introduced the DQ series, which is all-in-one solution to avoid the extra camera and microphone hanging around or laying on the ground of your meeting room.

Thanks to the 8M pixels on top of the frame, it provides client a high-definition quality picture for client to get a nice HD picture when making the video call. Moreover, the 8pcs of array microphones provide client the accurate voice on incoming or outgoing calls.

Various sizes panel @4K resolution to choose from

Standard sizes panel of choices 65 inches, 75 inches and 86 inches, can be chosen for your different sizes meeting room. With the stunning 4K resolution, you shall be able to see the details of your videos, photos or even presentation.

Panel comes with the Android OS as a startup system, and it also accept Windows OS, which you can have more choices on software to use. Under Android, functions like screenshot and

screen recording are well equipped for you already.

Other features to help during the meetings

Sharing of material from different screens including laptops, tablets, or smart phone, despite of their operating system. IOS, Windows, Android all can be shared to the big screen either using hardware or software.

Sharing of ideas is very crucial in a meeting, that is why we have the wireless sharing hardware DZ300/DZ320 for laptop or software Eshare. This sharing is not just limited to one person, you can have multiple sharing of screens to our panel at the same time to shorten the time on the meeting and bring up the efficiency of brainstorming session.

In the old days, when you need a big display, in the market, you may only have the solution of TV wall, which you may need 4 sets of maybe 50" display units plus a processor to separate the signal into 4 equal portions then project to each screen. With improvement of panel technology, now, you can enjoy a much bigger display with our 98" screen. Advantage of using a 98" screen instead of 4 pcs of 50" display are:

- Less service required;
- Less worry on the unevenness of screens;
- Zero beam inside

Optional Accessories:

OPS (Open Pluggable Specification)- Plug-in computing modules with choice of Intel® Core™ i5 and i7

DZ300/320 – screen sharing hardware

E Share- screen sharing software

DR10/DR12 – Mobile Stand with max loading @150kg
